

MIDAS METERING SERVICES LTD.

METERING INSTALLATION & DATA ACQUISITION SERVICES

DATA MANAGEMENT SERVICES

MIDAS provides electrical energy producers and consumers with an independent, out-sourced back-office electrical energy data management service. Whether it's to meet your obligations as an electrical energy producer or to feed your energy management department with critical energy consumption data on an on-going basis, MIDAS can meet your energy data management needs.

Data Acquisition

- Management of all systems and operational processes required to complete the on-going acquisition of interval energy data from remote electrical metering systems.
- Identification and reporting of any interval energy data anomalies that indicate possible metering system problems.

Data Processing

- Management of all data validation systems and operational processes required to verify the quantity and quality of the interval energy data acquired from remote electrical metering systems.
- Completion and documentation of any interval energy data estimation and editing processes that may be required.
- Completion of all processing required to aggregate or otherwise effect the complex algorithmic manipulation of interval energy data to produce 'virtual' or 'calculated' interval energy data sets.

Data Transfer

- Format of electrical energy interval data into standardized data file structures.
- Delivery of electrical energy interval data files to the client's internal systems or external agents.
