

MIDAS METERING SERVICES LTD.

METERING INSTALLATION & DATA ACQUISITION SERVICES

REVENUE METERING DATA MANAGEMENT SERVICES

Description: Revenue Metering Data Management Services are designed for clients who need to have their revenue metering data collected, validated, processed, stored and transferred in an effective, efficient and timely manner to the Transmission Administrator, Power Pool, Load Settlement Agent and/or other entity for financial settlement purposes.

Purpose: The purpose of Revenue Metering Data Management Services is to relieve the client from having to concern themselves with the day-to-day operational management of their revenue metering data by providing them with a full-service data management function so that they can then focus their full attention on managing their core business.

Services: The following services are provided:

1. Management of all data collection, processing (validation, compensations, aggregation,...) and transfer operations required to provide the fifteen (15) minute interval active and reactive energy measurement data for a singular point-of-supply measurement point (POS) and a singular point-of-delivery measurement point (POD) provided from a single metered site to the Transmission Administrator's data centre in the format, and in accordance with the schedule and timing, defined in the Transmission Administrator's Measurement System Standard.
2. Maintenance of an energy volume transfer receipts log to ensure that the Transmission Administrator's data centre receives and transacts all energy volume data into their measurement system database.
3. Maintenance and archival of the historical metering and measurement data as required by the Transmission Administrator's Measurement System Standard.
4. Reporting to the Client (or the Client's designate) any energy measurement data anomalies that indicate potential metering system or communications problems.
5. Administration of any metering or measurement data discrepancies that may exist with the Transmission Administrator and/or the Power Pool of Alberta where such discrepancies are the direct result of functions performed in connection with the provision of these services.

for all the real metering points defined and made part of a Revenue Metering Data Management Services agreement.

Pricing: Revenue Metering Data Management Services are available on a real meter point volume discounted basis. Please contact us directly for current and specific configuration pricing details.
